WooCommerce

Integrated Payment Processing for Every Business

Simplified Payment Collection

Work seamlessly within the ERP you use every day. Accept customer payments within WooCommerce using integrated solutions from REPAY.

- Tokenized credit card data
- Level 3 interchange benefits
- Credit card and ACH processing
- No installation, maintenance or set up fees
- 24/7 live support

Accept Payments in WooCommerce

A gateway and processor, REPAY offers omni-channel B2B and B2C integrated payment solutions for every business. If you do not understand your bill, we can explain how you are currently priced.

Customers can utilize multiple payment methods to pay you anywhere, anytime. Every transaction posts back automatically to WooCommerce to streamline reconciliation and reduce manual errors.

Protect Every Payment

Our platform is PCI-compliant and utilizes tokenization and encryption tools to enhance security. Store recurring payment information in our vault, not on your server.

Qualify For Lower Interchange

Sending Level 3 data with every transaction helps you qualify for lower interchange rates on Visa and Mastercard B2B transactions. We automatically pass the data for you!

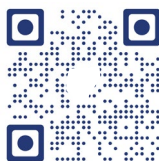

Hosted Form via Secure iFrame

Easily add secure payments to WooCommerce with REPAY's hosted iFrame form. Running on our servers, it processes Level 3 data at lower rates while reducing your PCI DSS scope. Customize the look and feel to match your brand and protect your business from security risks—all with support from our in-house team.
